

Re-charge your batteries with OASIS

AT A GLANCE...

- Oasis gives the flexibility of a power board but in a trendy, practical package.
- Wireless phone charging is optional.

“Easy as ECD®”

- Four gang unit with a combination of power, data, HDMI and dual USB charging options available.
- Optional Qi standard wireless phone charging for all compatible mobile phones. Simply place your wireless charging enabled device on the wireless charging module and it will begin charging.
- Can be supplied as either a portable station or secured to a work surface through an 80 mm grommet hole.
- Options for soft wired or with a flex and 3 pin plug.
- Standard colours: White, black, grey, red and blue.

For areas where security is needed, Oasis can be fixed to a surface through an 80 mm grommet hole.

Note: Mobile phone manufacturers such as Samsung, HTC, Nokia, Google, LG, Motorola & Sony already offer wireless charging as standard, some models may require the addition of a receiver coil, this takes a couple of minutes in most cases to fit. Apple iPhones currently require to be fitted into a thin case to enable wireless charging.
